SANDPAPERS

for the

Woodworking Industries

Your workmen equipped with Behr Quality Abrasives can work with the satisfying feeling that the materials you give them are, year in and year out, of the same dependable uniformity in grade, backing, evenness of coating and lasting power as was the case when their fathers, and in some instances, their grandfathers before them used Behr's Sandpapers.

Three generations of experience in applying abrasives to paper and cloth, have made it possible for Herman Behr & Co., Inc., to produce sandpapers of absolute uniformity of coating.

Always specify "Behr's" when ordering sandpaper.

Announcing The Greatest Development In Finishes For Decades.

A new product, VISCOLAC, has been developed by the du Pont Company for clear and enamel furniture finishes.

This material combines the following valuable advantages:

Hardest, toughest, most durable finish produced.

Does not check, crack or craze. Cannot print or become tacky.

It is waterproof.

Can be cleaned with soap and water.

Air-dries rapidly.

Steam, boiling water or hot dishes, etc., do not mar or soften it.

Progressive furniture manufacturers who have already adopted VISCOLAC, assert it does more than we claim.

Our technical men are available for a limited number of demonstrations.

TRUCKS THAT LAST

It's nothing unusual for a Nutting Truck to last a quarter of a century. One furniture manufacturer who first purchased a fleet of Nutting Trucks 28 years ago writes us that after continuous use ever since they are ALL still on the job.

WOODWORKERS' FLOOR TRUCKS

give long, dependable service because of (1) heavy hardwood platforms, sills and stakes (2) big, stout corner irons (3) heavy wheels and casters with spokes ribbed both ways, and with wide, flat faces to save floors (4) full inch solid rolled steel pxles. YOU CAN GET ALL THE FACTS IN OUR BULLETIN W-6. WRITE TODAY.

The New Mattison Ball-Bearing Rip Saw

Further refinement in the design and construction of this Chain Feed Rip Saw greatly adds to its utility. High-Grade ball bearings overcome friction and vibration. Throughout the feedworks, traveling chain and elsewhere, machine is provided with simple, yet positive take-up devices. The design provides for a compact, built-in motor drive.

Old King Tut

had a bow-foot bed but it wasn't made with one of our

Bow Foot Clamps

which clamps either foot or head at one operation. Many times quicker than the old method. Bassett Furniture Co. puts up a foot in 5 minutes.

Simple in operation. Small floor space required. Can change from foot to head in 2 minutes. Can also be used for case work.

Investigate our line of factory and kiln trucks.
